

Perfect Aquarian Mother

The Five Rules for

the Perfect Aquarian Mother

Woman must always be with her children, especially

between birth and seven; she must plan her activity

around them.

She is never negative to them by expression from her

mouth or by action of her body.

She gives her children what they need – she denies them nothing.

She has infinite patience – she never lets her children

see her out of her center (either

with them or with others).

She is constant in all of that.
